

## Signals VitroVivo Launch Services

Gain maximum value from Signals VitroVivo faster.

### Introduction

When you are ready to launch Signals VitroVivo to unite assay development, low throughput to ultra-high throughput production assays, High Content Screening, and in vitro/in vivo studies for streamlined access across all your assay and screening data, Revvity Signals is ready to get you up and at it quickly.

### Signals VitroVivo Launch Services

Signals VitroVivo Launch Services are all about self-enablement. When there's no time to ask the IT department to create a new application or feature, Launch Services will have you empowered to easily do it yourself. When you want to jump between different "components" and knock-in/out data points to fit a curve, Launch Services will have taught you how. Some of the other key benefits of deploying Signals VitroVivo with Revvity Signals Services include:

- Faster access to the advanced tools and techniques for more robust data analysis
- Self-enabled advanced workflows and statistics

- Frequent updates to new Signals VitroVivo functionality.

There are three levels of service depending on your needs. All levels of service include the ability to:

- Build reusable production quality workflow(s) with your own data
- Quickly learn to enhance existing workflows
- Quickly learn to build new workflows
- Deploy improved workflows and realize value in weeks, not months
- Deploy Signals VitroVivo in days and put enhanced workflows into production in weeks.

You've made the strategic decision to replace your old screening software with today's most robust, modern assay data management and analysis solution – Signals VitroVivo. Choosing Signals VitroVivo Launch Services is your next smart choice.

### Project Milestones and Timelines

### Signals VitroVivo Launch Services

	Tier I	Tier II	Tier III
Duration	3 Months	6 Months	12 Months
# Sig Workflow	2 low complexity assays	4 low-medium complexity assays	10 low-high complexity assays (max 2 for high complexity)
Installation	Signals VitroVivo including Signals Inventa, Signals Data Factory, and Spotfire		
Training	SF 101 + 102 + 304 Admin + SF 504 LDP		
Coaching	<ul style="list-style-type: none"> <li>Cloning workflow</li> <li>Calculation explorer</li> <li>Workflow deployment</li> <li>Build from scratch</li> <li>Signals Inventa data publishing</li> </ul>		
App Development	To be scoped separately, requires Managed Services engagement for ongoing support.		Up to 4
Data Integration	Publish to Data Factory		+ customize data publishing
Extended Support	1 round upgrade post-production	1-year Service (renewable)	1-year Managed Service (renewable)
