

Your Data: Who's In Charge?

Digital Solutions for More Effective Lab Operations

Your organization runs on **data**. You've invested heavily in it. But do you control your data, or does it control you? To truly realize the benefits of **digital transformation**, you need to capture data, make sense of it, and put it to use. You can't afford to be overwhelmed by the amount of data you have, held back by its complexity, or forced to commit valuable resources to sort through compliance issues.

Solutions from Revvity Signals can lead to accelerated, informed decisions, and remarkable results. Capture experimental data in your lab, and combine it with other

data sources to gain critical insights via data analytics.

Reduce overall cycle time, streamline scientific workflows, and make better decisions. With our solutions, you'll be able to transform inactionable data into productivity improvements and faster time to market.

Our digital solutions can make your lab operations as efficient as the rest of your organization, giving you better control of your data throughout your entire product development and manufacturing processes. Great data oversight allows you to quickly discover anomalies and reduce your compliance risk.

**HARNESS
YOUR LAB'S
DATA AND
LEVERAGE
ITS FULL
POTENTIAL**

The benefits of a paperless, digital lab include:

**Improved process
efficiency**

**Faster product
development**

**Better enterprise
analytics**

IMPACT OF GOING DIGITAL

25-30%

R&D lab efficiency
improvement

40%

Time saved on
routine tasks

1TB

Annual average
lab output

Let us help you
take charge of your
EXPERIMENTAL DATA,
and increase the efficiency
of your scientists.

To learn how Revvity Signals helps answer
these questions, and more:

ACCELERATED EFFICIENCY -

Boost Performance and Insights with a
Digital Lab from R&D to Product Release.

IMPROVED COMPLIANCE -

Enhance Data Understanding, Meet
Regulations, and Reduce Risk with
Better Informatics.

ADVANCED OVERSIGHT -

Improve Quality and Break Silos by
Capturing and Sharing Research Data.
